Feature Products

Sow topdress (abf-stm) – a high fat extremely palatable product full of chelated minerals and all the essentials to get her milking, keep her milking and reduce body condition loss during lactation. Feeding rate of 4-8oz / head /day during lactation.

High Fibre Pellets – an economical product that can be used to replace hay and extend the life of your silage or pasture. If your forages are running out and need to be extended these pellets are worth consideration.

New Computer Program

Jones Feed Mills will be updating its computer software program at the end of May. Product and customer codes will stay the same but invoices and statements will look slightly different. This program will allow for more features and services that are not available with our current system.

Chick Days

Jones Feed Mill will again be offering chick days out of our Wroxeter mill. Customers in that area can order chicks through the Wroxeter mill 519-335-3555. We have a full line of poultry feeds (starters, growers, finishers) for chickens, turkeys, ducks at all of our mills. We also have complete lines of non-gmo and organic poultry feeds

Upcoming Events

July 20th – Waterloo's Cattleman bus Tour

Confirmed stops are Whole Foods and St. Lawrence Market. Other stops yet to be confirmed are Loblaw's and Ontario Food Terminal. Each stop will include a tour and an opportunity to ask questions of the host regarding retailing meat and other foods in the high end Toronto market.
